please email techdoc@iodp.tamu.edu.**

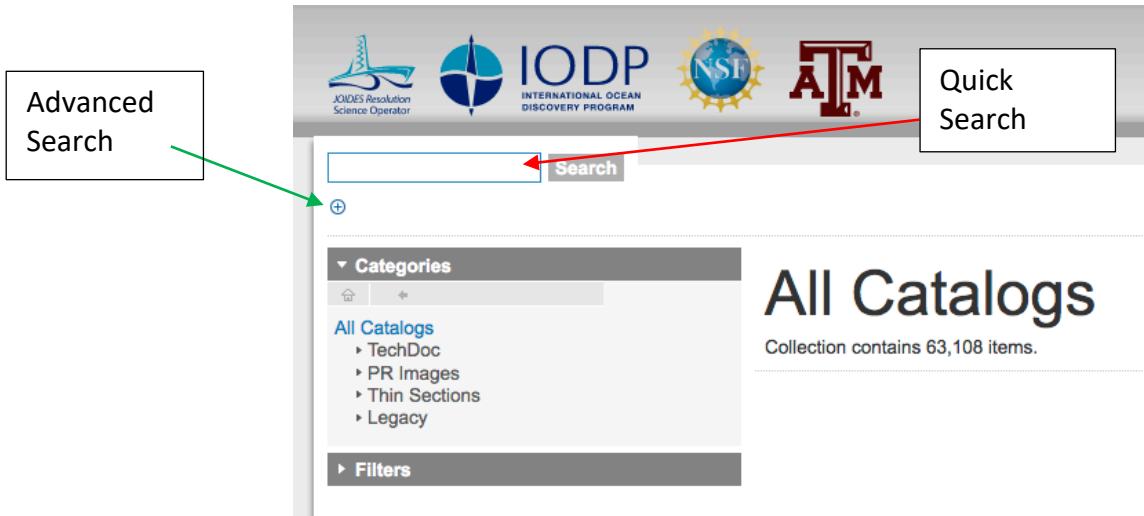

SEARCH TIPS

The JRSO Portal Quick Search and Advanced Find use Boolean functions to operate. There are a few examples of Boolean searches in this document; for more information see the *IODP JRSO Portal User Guide*.

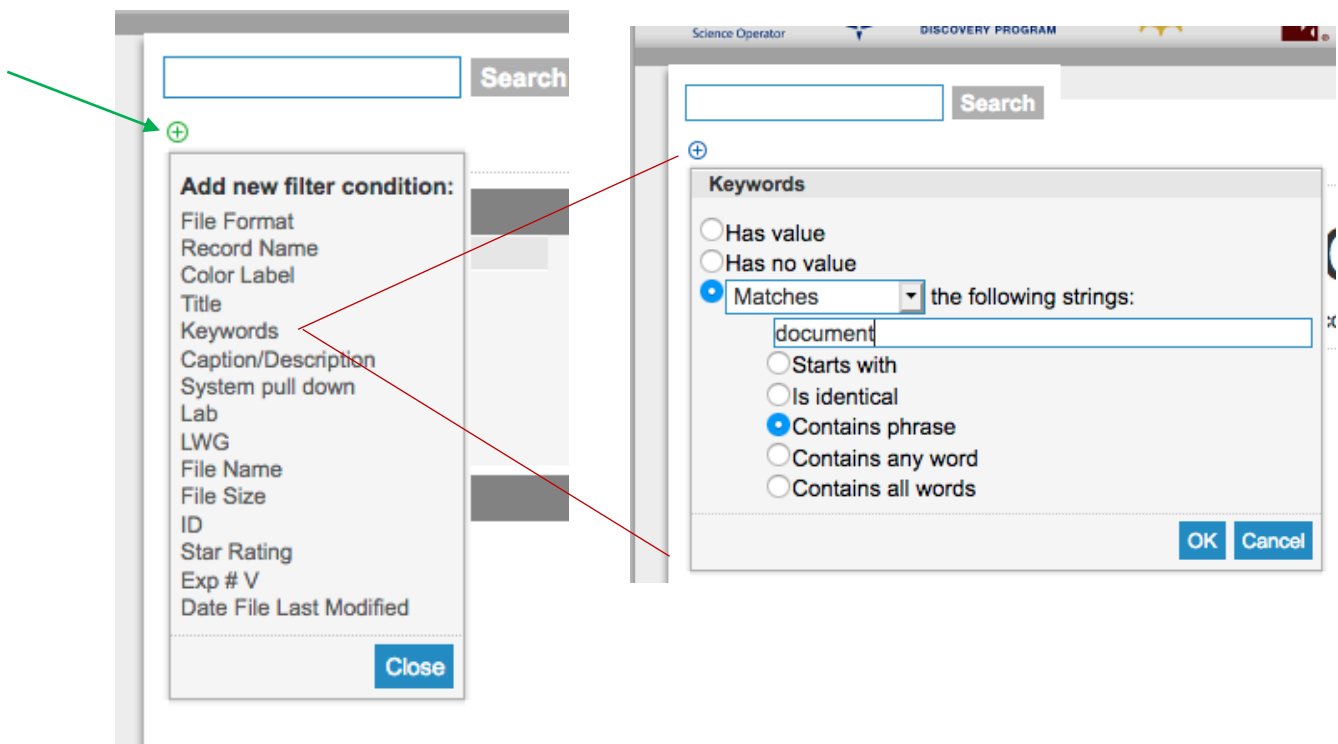

QUICK SEARCH OPTIONS

The Quick Search Option is set up to search the following fields:

- Keyword
- Title
- Caption/description
- File Name
- Record Name

The Portal Advanced Search (green arrow) allows a user to search specific fields listed. It may take a few seconds for the circle to appear or click in the Quick Search field.

The Quick or Advanced Searches will search all the catalogs listed on the left (see figure below). If you select one catalog, the search will look only in the catalog selected. As of Aug 2020, the figure on the left shows 1,104 results using the keyword *document* in the Advanced Search with all four catalogs shown. The figure on the right shows 250 items when the TechDoc catalog is selected using the same Advanced Search. To see all assets again, click on *deselect all filters* (red arrow).

BOOLEAN SEARCH FUNCTIONS

- User Guide* finds 'User' and 'Guide' as separate terms (default)
- Guide* (minus symbol then Guide) finds anything except 'Guide'
- User | | Guide* finds 'user' or 'guide' (user + shift + backslash key twice + guide)
- "User Guide"* finds the exact phrase 'User Guide'
- User -guide (user minus guide)* finds 'user' but not 'guide'

EXAMPLES

Examples of the above terms used in the Quick Search box for the TechDoc catalog (as of Aug 2020):

- **User Guide** in the Quick Search Box results in 68 files.
- **"User guide"** results in 67 files.
- **"User guide" -chemistry** results in 50 files.
- **"User guide" -chemistry strength** (this search finds user guides without the word 'chemistry' and with the word 'strength') results in 1 file.
- **User | | guide** ('or' search) results in 122 files.
- **User | | guide -chemistry** results in 98
- **User chemistry training** results in 3 files (searches for each term in one of 5 fields).

OVERARCHING TERMS

All assets in the TechDoc catalog are assigned one of the following terms: *document*, *drawing*, *graphic* (includes *figure*, *logo*, *map*, *photo*, and *screen capture*), or *video*. You can add one of these keywords to another search term (e.g., Exp 320 photo or SETP document) to narrow the results. Below is a list of the different file types and the category they fall under with examples.

Document includes the following type of files:

- Word
- Excel
- Power point
- PDF
- Flow charts
- Document with labeled photos (labeled photos only in a word document)

Document Example Searches:

- document conductivity = 19 assets varying from TPC, TK04, and Wayne Kerr Component Analyzer UG
- borehole photo = 228 photos associated with borehole observatories
- document xls = 391 documents; any information in Excel format including operations information spreadsheets, 44-pin cables, CORK plan, operations plan summary, operations schedule, CORK attachments, CORK spaceout, etc.
- document xls operations = 213 operations information spreadsheets, operations plan summary, etc.
- Adding an expedition or leg number to the search further filters results

Graphic includes (each of the following words are also keywords):

- Photo
- Figure
- Screen capture
- Logo
- Map

Graphic Example Searches:

- Photo FFF (most of the photos in TechDoc are from Operations personnel related to expeditions)
- Photo borehole
- Photo rig floor
- Figure chromatograph
- Figure SET
- Logo
- Map Exp 33 = 3 files (Exp 335, 336, and 339 site maps)
- Screen capture = 75 files mostly for ION Chromatograph and TOC, a few Vane Shear screen capture
- Graphic results in all of these files

Drawing lists autocad drawing files. There are a few other documents that will show, but they are usually associated with engineering.

Video: 31 instrument, CORK, underwater, or DESClogik files, plus a few documents related to VIT, coreline depth video overlay, or imaging.

TECHDOC CATALOG KEYWORDS

A, B

Active Heave (abandoned)
Advanced Piston Corer or APC
Advanced Piston Corer Temperature-3 (APCT-3)
Advanced User Guide or AUG
Alkalinity
Alkalinity Autotitrator
Analytical Gas Monitoring
APC or Advanced Piston Corer
APCT-3 Data
Ashing Furnance
Atlantic
Autotitrator
Balance (measure weight)
Balston Smart Dryer
Beacon
Borehole Observatory (AKA CORK; additional keywords to reduce results: dwg, figure, photo, video, installation, document)

C

Camera Configuration (SHIL)
Cary Spectrophotometer
Carver Press
Cation Column
Calibration
Certificate
Chemistry (will need to add other keywords to this, e.g., tech report, user guide, advanced user guide)
Chloride
CHNS
Clay mineralogy
Colletted delivery system

Color reflectance
Color standard
Colorimetric
Common instrument interface
Configuration (borehole configuration graphic)
Coulometer, coulometry
Core archive
Core Barrel Drill String Accelerometer (DSA)
Core box inventory
Core catcher
Core description
Core Lab cookbook
Core loggers (e.g., Accurange, acuity)
Core orientation
Core sheet
Coring summary
CORK (or Borehole Observatory)
Coulometry
Crisis Management
Cruise eval
Cryomagnetometer
Curation
curatorial

D

Data capture
Data retrieval
Daily Reports
Deepest holes
DESClogik
Delivery system
Demagnetization
Digital thermometer
Dionex
Discrete samples
Document (any Microsoft product and pdf files)
Downhole lab
Downhole logging (downhole alone = 100 results)
Drawing (autocad files)
DSDP (Deep Sea Drilling Project)
DVTPP (abandoned tool)

E, F

Elemental Analysis
End of expedition
Engineering (technical reports and other documents)
Espon printer
Expedition Technical Report (for full reports i.e., contains all the lab reports)
Fiber optic
Figure (or schematic)
FlexIT
Flow chart
Free Fall Funnel (Free-Fall funnel, FFF)
Freezer dryer

G, H, I, J

Gas Analysis*
Gas chromatograph
Gas safety
Gantry
GC2
GC3
GC-MSD
GI gun
Gradient mixer
Handbook (ODP)
Half Length APC (with or without hyphen)
Hole Number (e.g., Hole U15, U1530, "hole 12" gives holes that start with 12)
Icefield
ICP
installation
IODP
IODP statistical data
Ion chromatograph
IMS-SRM
Isotemp Muffle Furnace
Japan Sea
JOIDES Journal

K, L, M

Kerogen
Lab Officer Notebook
Labstack
Lamont Logging Inventory
Laser engraver
Legacy Hole (Legacy Holes = 4 results)

Light array
Liquid nitrogen generator
LIVE
Lockable float valve
Logger (aka track)
MAD (or moisture and density for UG only)
Manual
Mechanical bit release (or MBR)
Metrohm chromatograph
Microbiology
Microscope
Microscopy
Modular temperature tool
Multishot

N, O

Navigation
NGA
NGR (Natural Gamma Radiation)
ODP
ODP Final Technical Report
ODP statistical data
Olympus
Operating instructions
Operations (brings up manuals, reports, information spreadsheets, site maps; add additional keyword to reduce)
Operations Information Spreadsheet (add Leg/Exp number to reduce results)
Operations plan (add Leg/Exp number to reduce results)
Operations report (add Leg/Exp number to reduce results)
Organic matter

P, Q

Pacific
Paleomagnetic
Paleoceanographic
Paleoceanographic reference section
Paleoprep (2 docs) or paleo prep (45)
PEIS (Programmatic Environmental Impact Statement)
Perfluorocarbon
PICAT
Phone (phone lists for IODP)

Photomicrographs
Pipette
Pipetting
Policy or Policies
Pre-Post Site Name/Number
Pycnometer
pH alkalinity
Photo
Physical Properties (or PP, Phys Props)
Pipetting
P-Wave Velocity
Pressure Core Sampler (or PCS)
Quick Start Guide (or QSG)

R, S

Reentry (IODP style is no hyphen in reentry, but some files use re-entry)
Reentry Cone and Casing
Reference (type of document)
Refractometry
RigWatch
RIS (rig instrumentation system = tool sheets only)
Rock-Eval
Rotary core barrel (brings up manuals; RCB brings up operations files and photos)
Safety
SampleMaster (software program that tracked samples)
SBTF (abandoned tool; Simulated Borehole Test Facility)
Science movie room user guide (or just movie guide)
Screen capture
Section Half Image Logger (or SHIL)
Sediment Temperature pressure tool (manuals only; SETP adds photos and other documents)
Sediment Temperature tool (manuals; SET adds photos and other documents)
Seismometer
SEM (use scanning electron for just SEM user guide)
Shear Strength
Ship Exterior (photos)
Ship Operations Manual (ODP)
Ship schedule
Ship interior (photos-less likely)
SHMSL (or Section Half Multisensor Logger)
Site Map
SODV (few)
Software
Source Rock
Spinner Magnetometer
Spectrophotometry (use spectrophotomet to get both metry and meter)

Sputter Coating
SRM
Staff Directory
Strater
Statistical, statistics
Stratigraphic correlator
Stress and strength
System document

T

Technical Note
Telex log books (ODP, incomplete)
Temperature
Temperature Pressure Conductivity (TPC; abandoned tool)
Temporary tech
Thermal Conductivity
Thin section
Titration
TOC (total organic carbon reduces results)
Torvane
TP-FIT
Tracer analysis
Training ppt
Tool sheet
Types of core recovered

U, V, W, X, Y, Z

Ultrasonic Borehole Imager (UBI)
Underreamer
Underway
User guide (or UG)
Vane shear
Vendor
Vent piping
Video
Vibration Isolated TV (brings up tool sheets; VIT brings up files with activity, resistivity, conductivity)
VIT tensiometer
Water bath
WinFrog
WKPCA (electrical resistivity)
Working group
Workshop
WRSML (or Whole Round Multisensor Logger)
WSTP (or Water Sampler Temperature Probe)

XCB (or Extended Core Barrel)
XRD (or X-ray diffraction)
XRF (or X-ray Fluorescence)
